

BotYalla

The on-ramp for the merchant the formal system excludes

Half of Egypt's businesses are informal — and cannot obtain WhatsApp API. We start them on Telegram with zero paperwork, and collect on Vodafone Cash and InstaPay.

The entire market lives in chat

Government data — MCIT/CAPMAS, not a vendor estimate

61.7%

of Egyptian e-commerce
happens on Facebook pages

31.8%

inside WhatsApp groups

2.5M

Egyptian businesses on
WhatsApp Business

400K+

Facebook pages
operating as stores

⇒ **93.5% of Egyptian e-commerce happens inside Facebook and WhatsApp.**

But half the market is locked out

What WhatsApp API requires in Egypt

- ✗ Commercial register
- ✗ Tax card
- ✗ An unused phone number
- ✗ Facebook Business Manager
- ✗ Display name matching registration
- ✗ 3–5 days approval

50.7%

of Egyptian establishments are informal
and have none of the above

They generate 92.3% of private-sector output

**Every competitor sells WhatsApp only ⇒ none of them can
sell to these merchants.**

Our answer: start with no paperwork, collect on local rails

1

Telegram first

A bot in minutes. No register, no tax card, no approvals — and zero per-message cost.

2

Local collection

Vodafone Cash and InstaPay — 81% and 78% of Egypt's digital money. No competitor accepts them.

3

Graduate to WhatsApp

When the business formalizes we move it to the bigger channel — already a paying customer.

Why now: the payment rails exploded

Egypt mobile wallet growth — H1 2026

57M

81%

Vodafone Cash share of value

78%

InstaPay share of deposits

The competition — stated honestly

"Arabic bot builder" is not empty space. The gap is paperwork, currency and rails.

Competitor	Price	Arabic	Accepts VF Cash / InstaPay
Thikaa (Bahrain)	\$9.99–49.99	✓	✗
WhatsLoop (Saudi)	Free, then SAR 49	✓	✗
NeedBots (Egypt)	\$100–200	✓	✗
Quali-D (Egypt)	EGP 999–9,999	✓	✗
respond.io	\$79	✓ RTL	✗
Wati	\$25–199	✗	✗
BotYalla	Free – EGP 299 – EGP 899	✓ RTL	✓

Not one competitor — local, Gulf or global — accepts Egypt's payment rails.

Business model — priced by channel

Telegram has zero marginal cost. WhatsApp is billed per message. Pricing follows cost.

Free	Merchant	WhatsApp	Agency
EGP 0	EGP 299	EGP 899	EGP 2,999
per month	per month	per month	per month
Telegram · 1 bot Unlimited messages	3 bots · Vodafone Cash & InstaPay collection	WhatsApp channel 2,000 service messages	Unlimited clients White-label
Acquisition channel	Acquisition channel	Profit	The real profit

+ Gulf export: same product at market prices (\$29/\$79/\$199), with up to 35% ITIDA cash-back.

Unit economics — and the decision they force

Egypt CAC benchmark

EGP 2,000 – 8,000

Paid acquisition of individual SMBs does not work at the low tiers. Growth comes from agencies, integrations and the free tier — channels paid only out of revenue.

Go-to-market — channels, not ads

EasyOrders integration

200,000+ Egyptian stores · public API · zero cost

Agency channel

30–40% commission — nothing paid until revenue arrives

Arabic SEO

A page per vertical · the SERP is genuinely thin

The free tier

Telegram has no message cost ⇒ near-free virality

Data-led PR

"Egypt SMB Messaging Index" — the number everyone cites

Total budget for this plan: under \$1,500.

Where we are today — unvarnished

✓ Done

- A complete working product — Telegram and WhatsApp
- Abstracted channels, media, Meta templates
- Vodafone Cash and InstaPay collection
- Full admin console and dynamic pricing
- Promo codes and an affiliate system
- 123 automated tests, all passing
- A full, documented security review

✗ Not done

- No paying customers yet
- Not commercially launched
- Solo founder
- No retention data
- Meta Tech Provider verification not started

**The only question that matters: will the Egyptian merchant pay?
30 customers in 90 days settles it.**

The ask

\$50,000–70,000 — pre-seed / accelerator round

40%

Co-founder or first equity hire

Solo founders raise at half the expected rate

25%

Acquiring the first 200 customers

Via agencies and integrations, not ads

20%

Meta Tech Provider + Gulf expansion

Turns the WhatsApp channel from bleeding to profitable

15%

12 months of runway

Servers, infrastructure, messaging

+ A non-dilutive track: ITIDA Export-IT refunds up to 35% of export revenue (EGP 2.5m ceiling).

Why this wins

93.5% of Egyptian e-commerce happens inside Facebook and WhatsApp. And half of Egypt's establishments are informal — they cannot even open a WhatsApp API account.

We start them on Telegram with zero paperwork, and collect for them on Vodafone Cash and InstaPay — the two rails carrying 81% and 78% of Egypt's digital money, accepted by no competitor.

Then we graduate them to WhatsApp as they grow.
