

BotYalla

A bot that answers your customers and collects your money — while you sleep

No coding · No commercial register · Start free

The problem costing you every day

Customers message and nobody replies

A late reply cuts the chance of a sale many times over

The same question 40 times a day

"How much?" · "Do you deliver?" · "What time do you close?"

Collecting by phone calls and screenshots

No record, no confirmation, money slips away

Customers abandon the cart

80% of carts in Egypt are abandoned

BotYalla solves it in 10 minutes

1

Pick your business type

Store · Bookings · Customer service · FAQ · Support tickets · Reviews

2

Describe your business in one line

AI writes the whole bot for you — edit whatever you like

3

Turn it on and start receiving customers

A Telegram alert on every order, and a dashboard with everything

What no one else does

Collection via Vodafone Cash & InstaPay

Your customer pays the way they actually pay. 57 million wallets in Egypt, and Vodafone Cash alone carries 81% of transaction value.

Every other platform requires an international card — to subscribe and to collect.

No commercial register needed

Official WhatsApp requires a commercial register, a tax card, and approvals that take days.

With us you start on Telegram today, with zero paperwork — and when your business grows and registers, we move you to WhatsApp.

The return — a worked example

A modeled example for a home-based shop — assumptions stated, not a promise

Orders per month today	60
------------------------	----

Average order value	EGP 450
---------------------	---------

If you recover 1 cart in 7	+9
